FotoFinder Hub
Artikelnr. / *Product code*: Not applicable

Version: 2023.1

Zweckbestimmung / *Intended Use*:

FotoFinder Hub is a cloud-based image storage platform intended as a storage provider for mobile dermatoscopes. The purpose of FotoFinder Hub is to store and display images and annotations done by a dermatologist, patient information and analysis results. It is intended for the documentation of intact human skin and to visualize skin changes over time. The FotoFinder Hub is not intended to provide a diagnosis, as it is the responsibility of the dermatologist or physician. FotoFinder Hub is intended to communicate with the FotoFinder handyscope pro application and the FotoFinder Moleanalyzer pro and exchange data. The FotoFinder Hub is intended to administer credit and user management.
